OBJECTIVE

I started coding at a young age, I developed simple websites with JS and I loved it and then started App Development in ~2018 And I was hooked. I have been coding Android Apps ever since.

WAQAS TAHIR

EXPERIENCE

Since I have never worked in a company, I don't have any experiences but I have developed apps on my own that are available at Play Store.

- **Timeline** (Notes, Mind Maps, Reminders, Drawings App)
- **Mehndi Designs 2022** (User submitted mehndi designs, photos and art is categorized and collected)
- Many more that aren't available on play store (Simple Trivia and just some simple apps)

I have also developed apps as a freelancer on Fiverr.

- **Family Location** (location of family members is shared with family)
- **Photo Editor** (Import photos from Camera/Gallery and Edit them with custom filters and apply Style Transfer)

My experiences would be best reflected by my work on Github

- Github Profile (<https://github.com/wakztahir/>)

SKILLS AND ABILITIES

Android – Kotlin, Dagger/Hilt, Room/SQL Delight, MVVM, Kotlin Multiplatform, Jetpack Compose, Retrofit/Ktor, Material Design

EDUCATION

Superior College, Sargodha, Pakistan

- FSC Pre-Engineering from superior college Sargodha in Pakistan.

University of Sargodha, Pakistan (2 years – dropped out)

- Computer Science from University of Sargodha but dropped out after 2 years because of health issues and some other problems.

COMMUNICATION

I am good at communicating and working with other people. I try to do my best, to learn things that I am not good at, to become better. I love to help other people and work as a team.
